EDUCATION

BS in Software Engineering

ILMA University (2015-2019)

SKILLS

- Flutter
- Android
- iOS
- Dart
- Kotlin
- Java
- Swift
- Bloc
- Riverpod
- Cubit
- Provider
- Getx
- Hive
- SQLite
- Shared Preferences
- REST API
- API
- JSON
- GetIt
- Injectable
- Clean Architecture
- SOLID
- MVVM
- Debugging
- MVC
- WebSockets
- BuildRunner
- ErrorHandling
- Either

PROFILE

I am a Flutter developer with a bachelor's degree having more than seven years of experience developing quality mobile applications. I have worked with clients from the USA, New Zealand, UK and UAE, I have published several apps on App store and Play store throughout my professional career. I am always willing to learn and adapt to new technologies and methodologies.

EXPERIENCE

EpicMetry

Senior Flutter Developer / May 2025 - Present

As a Flutter Developer at EpicMetry, I design, build, and maintain cross-platform apps for iOS and Android using BLoC architecture for scalable, modular code. I integrate RESTful and GraphQL APIs, manage state efficiently, and implement Firebase services (Auth, FCM, Analytics, Crashlytics). I use platform channels for native features and ensure responsive, localized UI in collaboration with designers. I follow clean code practices, contribute to Git workflows and code reviews, and document technical decisions. I also participate in Agile ceremonies (standups, sprint planning, retros) to deliver high-quality client and in-house solutions aligned with business goals.

TechSurge Inc.

Sr. Software Engineer / June 2024 - May 2025

Led design and development of iOS/Android apps of the national oil company of Pakistan, PSO (Pakistan State Oil), using Flutter, delivering high-impact features and improved UX. Translated requirements into scalable solutions. using both Waterfall and Agile/Scrum methodologies. Managed budgets, project updates, QA processes, and full app lifecycle—from planning to post-launch support. Ensured client satisfaction through continuous collaboration and timely issue resolution.

Cvvlogs (Part-Time)

Flutter Developer / Feb 2022 - Jun 2022 (Remote)

As a part-time Flutter Developer, I implemented authentication (including social logins), integrated Firebase push notifications, and used platform channels for native code. I managed the full SDLC with Agile, from planning to post-launch support. I introduced Git workflows, conducted code reviews, and reduced code issues significantly. I also integrated third-party APIs (location, payments, social media), collaborated with UI/UX teams for pixel-perfect design, and maintained thorough documentation for future scalability.

- Testing
- Git
- GitHub
- Firebase
- Notifications
- Authentication
- Azure
- Analytics
- Crashlytics

INTERPERSONAL SKILLS

- Communication
- Self-motivation
- Decision making
- Problem Solving
- Time management
- State management
- Leadership
- Consultancy
- Collaboration
- Adaptability
- Team player
- Mentorship
- Analytical thinking

SI Global Solutions

Mobile Application Developer / Aug 2018 - May 2024

Led a team of 3 in developing Flutter-based cross-platform apps, boosting user engagement by 50%. Built a reusable app framework reducing feature development time by 50%. Managed full SDLC, using Agile/Waterfall, handling budgeting, design, testing, and deployment. Integrated Firebase push notifications, platform channels, and used BLoC, Provider, and GetX for state management. Also contributed to native Android development using Kotlin and Java.

EroSol

Android Developer / Dec 2016 - Jul 2018

Began as an intern, advancing to full-time, developing Android apps in Java & Kotlin. Implemented UI as per Material Design, integrated REST APIs, and followed best practices like MVVM, Dagger 2, and RxJava. Conducted testing with Espresso/JUnit, optimized performance, and ensured high-quality, scalable releases in Agile teams.

PROJECTS

24Six9 - Flutter (Dart, Kotlin & Swift)

A social networking application with event management and ticketing features. A versatile, multipurpose platform.

https://play.google.com/store/apps/details?id=com.epic.two_four_six_nine
<https://apps.apple.com/us/app/24six9/id6747582699>

Cvvlogs - Flutter (Dart, Java & Swift)

Video resume creator and job searching application for candidates to find jobs according to their skill set and industry.

Link: <https://play.google.com/store/apps/details?id=com.cvvlogs.candidate>

Jubilee Claim Surveyor - Native Android (Kotlin)

This app allows the surveyor to perform surveys with ease. Hassle-free inspections can be completed by filling out forms, making them ready for insurance processing.

Link: <https://play.google.com/store/apps/details?id=com.jgi.jgisurveyor.claim>

Efu myHealth - Native Android (Java)

EFU MyHealth app enables the customers to conveniently operate their Health insurance policy.

Link: <https://play.google.com/store/apps/details?id=com.allianzefu.app&hl=en>

Velociti Fitness - Flutter (Dart, Java & Swift)

A fitness app that makes movement rewarding. Join sponsored challenges, track your daily steps, and earn real rewards for staying active.

Link: <https://apps.apple.com/us/app/velociti-fitness/id6749670805>

Cvvlogs Recruiters - Flutter (Dart, Java & Swift)

Recruiter side application helping recruiters to post jobs and find suitable candidates for their opening with help watching video resumes.

Link: <https://play.google.com/store/apps/details?id=com.cvvlogs.recruiter>

MTECH MES - Flutter (Dart, Kotlin & Swift)

A smart warehousing and inventory management solution designed to streamline operations and provide real-time tracking of products across multiple warehouses.

Link: https://play.google.com/store/apps/details?id=com.jalen.mfg&hl=en_CA

The Journey - Flutter (Dart, Kotlin & Swift)

A CV optimization and CV builder application with mock interview and career consultancy features.

Comet Driver - Flutter (Dart, Kotlin & Swift)

Driver application guides the drivers on each step of the way with in-App routing. Powered by AI automation, so drivers never have to assume or plan the journey by themselves.

Invoice Automatic - Native Android (Kotlin)

"Invoice Automatic" is a one-stop-solution for creating invoices, estimations and sharing them with your clients and downloading them on PDF.
